

Studio 3 Marketplace – Feature List (V1)

(Mobile-First, AI-Guided Creative Marketplace)

Project Overview

AI-enabled marketplace for art supplies and creative materials.

The platform helps artists and creatives discover, evaluate, and purchase materials with AI-guided decision support based on skill level, project goals, and artistic style.

Studio 3 focuses on creative confidence and informed material selection—not just transactions.

Platform Structure

User Types

1. Buyers (Artists/Customers)

- Browse and purchase art supplies
 - Receive AI-guided material recommendations
 - Upload artwork for style-based suggestions
 - Track orders
 - Save favorites
-

2. Vendors/Sellers

- List and sell art supplies
 - Manage inventory
 - Receive and fulfill orders
 - Basic sales visibility
-

3. Platform Administrators

- Approve vendors
 - Moderate products
 - Monitor orders
 - Manage payouts
 - View core analytics
-

Core Features

1. Mobile Homepage & Navigation

Homepage Layout (Mobile-First)

Header

- Logo
- Prominent search bar

- Cart icon
 - Account icon
-

Main Content

- Medium-based categories
 - Featured materials
 - AI tools entry points:
 - “Help Me Choose”
 - “Build a Starter Kit”
 - “Upload Artwork”
-

Footer

- Help & Support
 - Terms & Policies
 - Contact
-

2. Product Categories & Organization

Medium-Based Categories

Painting Supplies

- Acrylics
 - Oils
 - Watercolors
 - Brushes
 - Surfaces
 - Mediums
-

Drawing Supplies

- Pencils
 - Pens & Markers
 - Sketchbooks
 - Paper
-

Sculpting & Modeling

- Clay
 - Tools
 - Molds
-

Studio Essentials

- Storage
- Safety gear

- Cleaning supplies
-

Filters (Minimal)

- Skill level
 - Surface compatibility
 - Price band
 - Format/size
-

3. AI-Powered Search & Discovery

Search

- Natural language input
- Autosuggest
- Synonym recognition

Examples:

- “Paint for textured landscapes”
 - “Beginner portrait supplies”
-

4. Product Detail Page (PDP)

Main Content (Top Priority on Mobile)

- Product images
 - Price
 - Add to Cart
-

AI Guidance Section

- AI Summary
 - Best For
 - Tradeoffs
 - Skill level suitability
 - Plain-language explanations
-

Additional Details (Below Fold)

- Specs
 - Material details
 - Safety info
-

5. AI Decision Tools (Core Differentiators)

A. AI “Help Me Choose”

Guided tap-based flow:

- Skill level
- Surface
- Desired look/finish
- Budget sensitivity

Output:

- 1–2 recommended products
 - Plain-language reasoning
-

B. Upload Artwork → Material Suggestions

User uploads photo of artwork.

AI analyzes:

- Texture
- Color usage
- Detail level

Outputs:

- Suggested materials
- Suggested tools
- Technique guidance

Positioned as inspiration and learning.

C. AI Project-to-Materials Builder

User describes project:

- Text or voice input

AI returns:

- Recommended paints
- Brushes
- Surfaces
- Optional materials

D. AI Starter Kit Builder

Inputs:

- Medium
- Skill level
- Budget

Outputs:

- Basic kit
 - Comfortable kit
 - Pro kit
-

E. AI Product Translator

Converts technical terms into plain language.

Example:

- “High viscosity” → “Thicker paint that holds brush strokes.”
-

6. Shopping Cart

- Product thumbnail
 - Quantity selector
 - Remove item
 - Subtotal
 - Checkout button
-

7. Checkout (Mobile-Optimized)

Features

- Guest checkout
- Autofill support
- Apple Pay / Google Pay
- Credit/debit cards
- Tax + shipping calculation

Order Confirmation

- Order summary
 - Tracking link
 - Email confirmation
-

8. User Accounts

Dashboard

- Order history
 - Saved addresses
 - Favorites
-

9. Vendor Dashboard (Lean V1)

Vendor Onboarding

- Application
 - Identity verification
 - Approval flow
-

Product Management

- Upload products
 - Add images
 - Set pricing
 - Manage inventory
-

Orders

- Receive order notifications
 - Update fulfillment status
-

Payouts

- Basic payout tracking
 - Linked bank account
-

10. Admin Dashboard

Platform Management

- Vendor approvals
- Product moderation
- Order oversight

- Dispute handling
-

Analytics (Core Only)

- Orders
 - Conversion rate
 - AI tool usage
 - Top categories
-

11. Trust & Safety

- Secure payments
 - SSL encryption
 - Vendor verification
 - Return policy
 - Buyer protection
-

12. Shipping & Fulfillment

- Platform-managed fulfillment
- Standard shipping options
- Tracking numbers

- Delivery notifications
-

MVP Success Metrics (KPIs)

AI Metrics

- AI tool usage rate
 - AI → purchase conversion
 - Starter kit builder usage
 - Upload-to-suggestion usage
-

Business Metrics

- Conversion rate
 - Average order value
 - Repeat purchase rate
 - Customer satisfaction
-

MVP Scope Summary

Must-Have for Launch

For Buyers

- Browse by medium
 - AI decision tools
 - PDP with AI summaries
 - Cart & checkout
 - Order tracking
 - Basic accounts
-

For Vendors

- Apply
 - Upload products
 - Manage inventory
 - Receive orders
 - Payouts
-

For Admin

- Vendor approval
- Product moderation
- Order monitoring
- Core analytics
